DOMESTIC CLEANING

COME HOME TO A WELL ORGANISED, CLEAN HOUSE

Fully customisable 4-hour classes conducted in the comfort of your home. Smaller apartments may only need one class, while larger homes might require three, but the average is two 4-hour classes.

Covering a comprehensive range of topics, we address everything from product selection and usage to the principles of cleaning, correct cupboard packing, indoor plant care, and pet feeding if necessary. Tailored to meet your household's needs, the training emphasises routine and meticulous attention to detail. Practical hands on, immediate results visible.

Recognising the unique personalities of each individual and staff member, we adapt our approach accordingly. The training incorporates essential Change Management elements, ensuring that your staff not only welcomes the training but also feels confident integrating their newfound skills into their daily routines.

Our experienced trainer will guide your domestic worker in the most effective house cleaning methods, matching each item with the appropriate cleaning product and tools. Our training endorses the use of potent yet gentle cleaning tools like sugar soap, bicarbonate of soda, and white vinegar – simple ingredients, remarkable results!

BASIC COURSE STRUCTURE

- Personal hygiene
- Time management and organisation
- Job requirements and communication (incl. guidelines for the use of a cellphone)
- Good cleaning habits (incl. working quietly and vacating occupied spaces when necessary)
- Proper product usage
- Establishing cleaning routines
